your digital world, secured

## The Daily T.R.U.T.H.

### (Temporary Remote Universal Threat Hunt)

During these trying times, companies' priorities and focus are on issues such as protecting resource health, supporting a remote workforce and preparing for global financial crisis.

LIFARS, known as one of the leading companies in incident response and forensics services, sees that cyber security teams are stretched thin and are distracted from the prime objective of fighting off the bad guys.

In response to this, LIFARS will be offering a new service: The Daily T.R.U.T.H.

- It is a daily, proactive cyber threat hunt where LIFARS will be searching for potential threats living in your network.
- We will report daily on any issues we find.
- There will be a weekly summary and a monthly report.
- This is only a month-to-month service and is meant to be temporary during these next few months.
